Summary

A dedicated Bachelor of Science in Information Technology student from National Teachers College with a strong enthusiasm for technology and modern web development. Highly detail-oriented and consistent in delivering quality work, with fundamental knowledge in building and designing websites using HTML, CSS, JavaScript, and responsive web design techniques. Passionate about UI/UX principles, website optimization, and interactive user interface development, while also experienced in utilizing frameworks and tools such as React, Bootstrap, and WordPress.

Proficiency & Abilities

Front-End Developer

- Proficient in developing and programming user interfaces using core web technologies such as HTML, CSS, and JavaScript.
- Utilizing modern frameworks and platforms including React, Angular, and WordPress for web development projects.
- Capable of developing both web and mobile applications with responsive and user-focused design principles.

User Interface Designer

- Designs user-friendly and visually appealing interfaces for web and mobile applications with a focus on usability and accessibility.
- Applies UI/UX principles such as user-centered design, information architecture, and interaction design to create effective digital experiences.
- Creates wireframes, mockups, and prototypes to visualize and test design concepts before development.
- Continuously researches and applies modern design trends, tools, and best practices to improve overall user experience.

Structural planning

- Applies structural planning principles to organize and design clean, scalable frontend layouts that enhance website and application architecture.
- Ensures proper structure of UI components and interface elements for better usability, responsiveness, and user experience.

Intrapersonal Skills

- Demonstrates strong self-awareness and the ability to evaluate personal strengths and areas for improvement to support continuous growth as a developer.
 - Practices self-discipline and time management to efficiently complete tasks and meet project deadlines in frontend development work.
-

Work Experience

Web Developer - Intern

February - May 2026

Inquirer Interactive

- Assists in developing responsive and user-friendly web interfaces using core technologies such as HTML, CSS, and JavaScript.
- Supports the implementation of frontend features and components using modern frameworks like React and content management systems such as WordPress.
- Collaborates with development teams to translate UI/UX designs into functional and interactive web applications.
- Accomplished five project tasks during internship.

Web Developer - Front-End & UI/UX

March - December 2025

Capstone Project

- Developed and implemented the frontend of the Capstone Application System using React Native, ensuring responsive and user-friendly interfaces.
- Assisted in frontend web development, contributing to the design, implementation, and optimization of user interfaces.

Freelancer

October 2025 - March 2026

Data Annotator, Taskverse, Ogden Project

- Listening to audio recordings and accurately transcribing speech.
 - Identifying patterns or specific elements in videos and images.
 - Ensures high-quality data by following detailed guidelines and maintaining accuracy in every annotation task.
 - Analyzes multimedia content, including audio and images, to provide structured and labeled datasets for AI training.
-

Educational Background

National Teachers College

September 2022 - August 2026

Bachelor of Science in Information Technology

- Gains foundational knowledge in information technology, including basic programming, computer systems, and understanding of core concepts in HTML, CSS, and JavaScript.
 - Develops stronger technical skills by learning structured programming, database management, and beginning hands-on projects involving web and system development.
-

Achievements & Certifications

Gawad Ningas

May 2026

The best capstone of all fourth-year level in NTC

- It reflects innovation and problem-solving by improving or automating existing processes in areas such as education, business, or community services. The system should be reliable, scalable, and meaningful in terms of its purpose and impact.

Pagkamalikhain Awards

May 2026

Best Innovate Capstone

- The best innovative capstone project is a final academic project that demonstrates creativity, practical problem-solving, and the effective application of knowledge to address real-world challenges.

Magna Cum Laude

May 2026

Honor Student

- Honor with strong technical, problem-solving, and analytical skills, with a passion for technology and continuous learning.
