Summary

A dedicated Bachelor of Science in Information Technology graduate at National Teachers College with a strong interest in frontend, research, and software development. Detail-oriented and committed to delivering quality work with a solid foundation in web development using HTML, CSS, JavaScript, and responsive design. Experienced in creating user-focused interfaces with knowledge of UI/UX principles, website optimization, and interactive web development. Familiar with modern tools and technologies such as React, Bootstrap, WordPress, SQL, and Elementor.

Proficiency & Abilities

Front-End Developer

- Proficient in developing and programming user interfaces using core web technologies such as HTML, CSS, and JavaScript.
- Utilizing modern frameworks and platforms including ReactJs, Tailwind CSS, and Bootstrap for web development projects.
- Capable of developing both web and mobile applications with responsive and user-focused design principles.
- Applies UI/UX principles to create clear, accessible, and engaging user interfaces.

Web Developer

- Develops and maintains reliable software solutions with a focus on functionality, performance, and scalability.
- Writes clean, organized, and maintainable code while following best practices and development standards.
- Creates wireframes, mockups, and prototypes to visualize and test design concepts before development.

Data and Statistical Analysts

- Conducts research and gathers relevant data to support the development, evaluation, and improvement of technical projects and solutions.
- Applies statistical analysis and data interpretation to identify patterns, generate insights, and support evidence-based technical decisions
- Organizes, cleans, and structures collected research data to ensure accuracy and readiness for statistical analysis.
- Use some tools to organize, such as Microsoft Excel and Python. Learn basic fundamentals of Machine Learning frameworks in Python such as Pandas, NumPy, Matplotlib, and Seaborn.

Reporting Analyst

- Applied basic data analysis fundamentals to organize and interpret datasets for accurate and meaningful insights.
- Utilized fundamental SQL concepts to query, filter, and retrieve data from relational databases.
- Gained foundational knowledge of ETL (Extract, Transform, Load) processes for collecting, transforming, and preparing data for analysis and reporting.

Structural Planning

- Applies structural planning principles to organize and design clean, scalable frontend layouts that enhance website and application architecture.
- Ensures proper structure of UI components and interface elements for better usability, responsiveness, and user experience.

Intrapersonal Skills

- Demonstrates strong self-awareness and the ability to evaluate personal strengths and areas for improvement to support continuous growth as a developer.
- Practices self-discipline and time management to efficiently complete tasks and meet project deadlines in development work.

Work Experience

Web Developer - Intern **February - May 2026**

Inquirer Interactive

- Assisted in developing responsive and user-friendly web interfaces using core technologies such as HTML, CSS, and JavaScript.

- Supported the implementation of frontend features and components using modern frameworks like React and content management systems such as WordPress.
- Collaborated with development teams to translate UI/UX designs into functional and interactive web applications.
- Accomplished five project tasks during internship.

Web Developer - Front-End & UI/UX — March - December 2025

Capstone Project

- Developed and implemented the frontend of the Capstone Application System using React Native, ensuring responsive and user-friendly interfaces.
- Assisted in frontend web development, contributing to the design, implementation, and optimization of user interfaces.
- Contributed a knowledge using different tools and frameworks such as React, Figma, Canva, Javascript, Tailwind CSS, etc.

Researcher - Data Analysis — March - December 2025

Capstone Project

- Conducts comprehensive research and systematically gathers, organizes, and analyzes relevant data to support technical projects and system development.
- Evaluates research findings and statistical data to identify key insights, assess project requirements, and inform the planning, design, and development of effective technical solutions.
- Prepared clear and structured research reports, data summaries, technical documentation, and presentations to communicate findings and recommendations to technical and non-technical stakeholders.

Freelancer — October 2025 - March 2026

Data Annotator, Taskverse, Ogden Project

- Listened to audio recordings and accurately transcribing speech.
- Identify patterns or specific elements in videos and images.
- Analyzed multimedia content, including audio and images, to provide structured and labeled datasets for AI training.

Educational Background

National Teachers College — September 2022 - August 2026

Bachelor of Science in Information Technology

- Gains foundational knowledge in information technology, including basic programming, computer systems, and understanding of core concepts in HTML, CSS, and JavaScript.
- Developed stronger technical skills by learning structured programming, database management, and beginning hands-on projects involving web and system development.

Achievements & Certifications

Best in Capstone — May 2026

The best capstone of all fourth-year level in NTC

- It reflects innovation and problem-solving by improving or automating existing processes in areas such as education, business, or community services. The system should be reliable and meaningful in terms of its purpose and impact.

Pagkamalikhain Awards — May 2026

Best Innovate Capstone

- The best innovative capstone project is a final academic project that demonstrates creativity and effective application of knowledge to address real-world challenges.

Magna Cum Laude — May 2026

Honor Student

- Honor with strong technical and analytical skills, with a passion for technology and continuous learning.

Developing Front-end Apps with React — October 2025

IBM

- Successfully completed a digital course in React has demonstrated proficiency in developing modern, and responsive web applications using the React framework.
